## Certifications

### KBZ Bank -Software Engineer, Yangon

2023 - Present

- Team Collaboration Award, KBZ Bank- (2023)
- Team Collaboration Award, KBZ Bank- (2024)

## Skills

- NodeJs
- Software Development Standards
- Troubleshooting and resolution
- Debugging techniques
- API design
- .NET development
- SOAP and Restful Web Services

# Experience

## Software Engineer @ KBZ Bank -Software Engineer, Yangon

January 2023 - March 2024

- Investigated new and emerging software applications to select and implement administrative information systems.
- Consistently met project deadlines by effectively managing time and prioritizing tasks according to importance.
- Designed enhancements and updates for subsystems of end-user applications software running on local, networked and internet-based platforms.
- Conducted regression testing and submitted observations to development team.
- Promoted experience with Kubernetes, Docker and Amazon Web Services.
- Analyzed work to generate logic for new systems, procedures and tests.
- Analyzed data to coordinate installation of new systems or modification of existing systems.
- Built databases and table structures for web applications.
- Represented software applications engineering team during large and complex development projects.
- Tested and deployed scalable and highly available software projects.
- Developed a queue management system to optimize customer service efficiency.
- Designed and implemented backend APIs, including credit card APIs, utilizing dynamic routing client service.
- Implemented Continuous integration/Continuous Deployment (CI/CD) processes for efficient deployment.
- Designed and developed micro services architecture for cloud infrastructure.
- Gained experience in AWS cloud computing and utilized services such as DynamoDB.
- Developed local GPT engine and KBZ GPT for Generative AI applications.

## Web Developer @ Marvellous Software House - Junior Software Developer, Yangon

January 2021 - January 2022

- Authored code fixes and enhancements for inclusion in future code releases and patches.
- Tested troubleshooting methods and documented resolutions for inclusion in knowledge base for support team use.
- Reduced system crashes by proactively monitoring performance metrics and addressing issues promptly.
- Enhanced software performance by identifying and fixing bugs through thorough testing and debugging processes.
- Developed Spring Boot applications using Java for backend APIs.
- Utilized React and Node.js frameworks for frontend development.
- Worked with SQL databases including PostgreSQL and MySQL.
- Contributed to the development of various projects, focusing on e-commerce solutions.

## Web Developer@ MICT Software House - Software Developer Intern, Yangon

January 2020 - December 2020

- Collaborated with team members to design, develop, and launch a user-friendly software product.
- Developed E Commerce project using Laravel Framework and PHP programming language.
- Optimized code performance by identifying bottlenecks and refactoring for improved efficiency.
- Tested troubleshooting methods and documented resolutions for inclusion in knowledge base for support team use.
- Utilized Laravel framework with PHP for backend development of APIs.
- Developed projects including e-commerce and music streaming platforms.
- Designed frontend interfaces using Bootstrap framework.
- Conducted API testing using Postman to ensure functionality and performance.
